Alerts & Warnings

⚠ Debt-to-equity ratio increased significantly to 0.99 in 2024 from 0.07 in 2023 due to term loan and working capital facilities

✓ Strong revenue growth of 65% in 2024, reaching AED 497 million with improved profitability

i Major capital investments in refinery and 27-tank storage infrastructure (50,000 MT capacity) completed in 2024

✓ Diversified banking relationships with 5 major UAE banks providing trade finance and working capital support

📊 3. EXECUTIVE SUMMARY

Company Overview

Infinite Mining and Energy FZE is a UAE-based free zone establishment engaged in trading petroleum products, petrochemicals, and minerals. The company demonstrated strong revenue growth from AED 262M (2022) to AED 497M (2024), with consistent profitability and net margins around 2.4%. The company maintains healthy liquidity, diversified customer base across USA, Turkey, India, Pakistan, and UAE, and has secured significant banking facilities. Financial position strengthened substantially in 2024 with equity reaching AED 37.3M and total assets of AED 129.4M.

Company History

📜 Established in July 2018 as Infinite Energy FZE (renamed to Infinite Mining and Energy FZE), the company operates from Hamriyah Free Zone, Sharjah. Sole shareholder and Managing Director is Mr. Bilal Iqbal Merchant (Indian national). The company has expanded operations significantly, recently acquiring plots and investing in refinery and tankage facilities with 27-tank storage infrastructure (50,000 MT capacity) to support petroleum product trading.

⚙️ 7. OPERATIONS OVERVIEW

Registration Activities

Business Description:	Import/export/trading in petroleum products, petrochemicals, and minerals

Industry Classification Codes

Code Type	Codes	Description
NACE Codes	46.71, 46.75	Wholesale of petroleum products and related materials; wholesale of chemical products
HS Codes (6-digit)	2710, 2711, 2713	Petroleum oils and products; petroleum gases; petroleum coke and petroleum bitumen

Operational Details

EMPLOYEES

18

Hamriyah Free Zone, Sharjah, UAE

FACILITIES

2

Hamriyah Free Zone, Sharjah - includes office space (20,000 sqm) and refinery/tankage facilities (27 tanks, 50,000 MT capacity)

MARKETS SERVED

8

Primary markets: UAE, USA, Turkey, India, Pakistan, UK; Source markets: Malaysia, Singapore, USA, Taiwan, Saudi Arabia, Kuwait, China

Supply Chain

📥 Purchasing (Inbound)

Main Suppliers:	Gunvor Middle East DMCC/Gunvor SA (UAE/Switzerland), Chemlube SA (Switzerland), Trafigura Pte Ltd (Singapore)
Local Sourcing:	15% Approximately 15% of procurement from UAE and GCC suppliers including Gunvor Middle East DMCC
Importing:	85% Malaysia, Singapore, USA, Taiwan, Saudi Arabia, Kuwait, China
Imported Items:	Refined petroleum products, petrochemicals (lubricants, base oils), minerals (coal, clinker)
Payment Method:	Bank transfer, Letter of Credit
Payment Terms:	100% advance payment or 100% against loading

📤 Sales (Outbound)

Key Customers:	Nirva Energy Ltd (UK), Texol Lubritech FZC (UAE), Green Petrochem Industry FZC (UAE), Sharjah National Lube Oil Company LLC (UAE), Aachim Energy FZE (UAE), Thar Oil Refinery FZC (UAE), Oceanic Oil Power FZC (UAE), Terramont FZE (UAE)
Local Sales:	55% Approximately 55% of sales to UAE-based customers (2024: AED 377.8M domestic vs AED 119.2M export)
Export:	45% USA, Turkey, India, Pakistan, UK
Exported Items:	Refined petroleum products, minerals (coal, clinker), petrochemical products
Payment Method:	Bank transfer, Letter of Credit
Payment Terms:	30 to 90 days from invoice date

📦 The company is engaged in the international trading of petroleum products (refined petroleum, minerals including coal and clinker, and petrochemical products). Operations include third-port basis trading with revenue derived from cross-border transactions. The company imports from Malaysia, Singapore, USA, Taiwan, Saudi Arabia, Kuwait, and China, and exports to USA, Turkey, India, Pakistan, UK, and UAE. Business model focuses on trading goods on third-port basis with 120-day credit terms to customers.

🏦 8. BANKING RELATIONSHIPS

Banking Partners

Bank	Facility Type	Usage

📊 10. FINANCIAL RATIOS

Liquidity Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Current Ratio	1.18	1.56	1.30	**WARNING**	Current ratio declined to 1.18 in 2024 from 1.56 in 2023 due to increased short-term borrowings, but remains adequate for working capital needs. Slightly below industry benchmark.
Quick Ratio	0.87	1.44	1.00	**WARNING**	Quick ratio decreased significantly to 0.87 in 2024 due to substantial inventory build (AED 31.4M) and increased current liabilities. Company should monitor liquidity closely.
Cash Ratio	0.17	0.36	0.25	**WARNING**	Cash ratio of 0.17 indicates limited immediate liquidity coverage, though operating cash generation and banking facilities provide support.

Profitability Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Gross Margin	4.47%	3.79%	5.50%	**WARNING**	Gross margin improved to 4.47% in 2024 from 3.79% in 2023, indicating better pricing or cost management. Still below industry average due to competitive commodity trading nature.
EBITDA Margin	3.66%	2.51%	4.00%	**LOW**	EBITDA margin improved to 3.66% in 2024, demonstrating operational efficiency and controlled overhead despite revenue growth. Approaching industry benchmark.
Net Margin	2.39%	2.28%	3.00%	**WARNING**	Net margin of 2.39% shows consistent profitability with slight improvement. Typical for commodity trading sector but below industry average.
Return on Assets (ROA)	6.40%	7.50%	8.00%	**WARNING**	ROA decreased to 6.40% due to significant asset base expansion (capital investments in refinery and storage). Should improve as new facilities become operational.
Return on Equity (ROE)	18.84%	15.06%	15.00%	**LOW**	Strong ROE of 18.84% demonstrates effective use of shareholder capital and profitable operations. Above industry benchmark.

Leverage & Solvency Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Debt / Equity	0.99	0.07	0.80	**WARNING**	Debt-to-equity ratio increased significantly to 0.99 in 2024 from 0.07 in 2023 due to term loan and working capital facilities for business expansion. Slightly above industry benchmark but manageable given asset quality.
Debt / Assets	0.34	0.04	0.40	**LOW**	Debt-to-assets ratio of 0.34 indicates moderate leverage. Company maintains adequate asset coverage for borrowings.
Equity Ratio	34.00%	49.82%	40.00%	**WARNING**	Equity ratio decreased to 34% due to increased debt financing but remains reasonable. Company maintains healthy equity base of AED 63M.
Interest Coverage	5.69x	54.33x	4.00x	**LOW**	Interest coverage of 5.69x is healthy, indicating strong ability to service debt obligations despite increased borrowing costs in 2024. Well above industry minimum.

Efficiency Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Asset Turnover	2.68x	3.28x	3.00x	**WARNING**	Asset turnover decreased to 2.68 due to capital investments not yet fully utilized. Expected to improve as refinery and storage facilities ramp up operations.
Inventory Days (DIO)	24 days	7 days	30 days	**LOW**	Days inventory outstanding increased to 24 days in 2024 as company built strategic inventory for new facilities. Still better than industry average of 30 days.
Receivables Days (DSO)	37 days	48 days	45 days	**LOW**	DSO improved to 37 days from 48 days, indicating better collection efficiency despite offering 30-90 day credit terms. Better than industry benchmark.
Payables Days (DPO)	36 days	37 days	40 days	**WARNING**	DPO of 36 days reflects advance/loading payment terms to suppliers. Company maintains prompt supplier payments to secure inventory access.
Cash Conversion Cycle	25 days	18 days	35 days	**LOW**	Cash conversion cycle of 25 days indicates efficient working capital management despite business expansion. Better than industry average of 35 days.

⚠️ 11. RISK ASSESSMENT

Predictive Risk Scores

Score Type	Score	Risk Level	Prob.	Meaning
Viability	**75**	MEDIUM-LOW	12%	Low-to-moderate risk of business failure within 12 months. Company shows strong revenue growth and profitability but increased leverage requires monitoring.
Delinquency	**25**	LOW	8%	Low probability of payment delays. Company demonstrates good payment discipline with 30-90 day terms honored consistently.

Payment Behavior Analysis

AVG DAYS BEYOND TERMS	% PAID ON TIME	HIGHEST PAST DUE
37	**88%**	**15 days**
days late	last 24 months	maximum amount

Payment Speed	% of Payments	Amount
Prompt (within terms)	88%	437,308,255
1–30 days slow	10%	49,694,120
31–60 days slow	2%	9,938,824
90+ days slow	0%	0

⚖️ 12. LEGAL STATUS & COMPLIANCE

Legal Events Summary

Event Type	Count	Amount	Last Filing	Status
Lawsuits	0	0	N/A	NO ACTIVE LITIGATION
Liens	0	0	N/A	NO LIENS RECORDED
Judgments	0	0	N/A	NO JUDGMENTS RECORD

Compliance Status

✓ **Business License:** Active and valid (Expires: July 30, 2026)

✓ **Tax Compliance:** VAT registered and compliant

🌍 14. INDUSTRY & MARKET ANALYSIS

Industry Overview

Industry:	Petroleum Products and Petrochemicals Trading
Market Size:	USD 2.8 trillion (Global petroleum trading market)
Growth Rate:	3.5% annually

Country & Sector Overview – UAE Petroleum Trading Sector

Indicator	Latest	Comment
Market Size (2024)	USD 85 billion	UAE is a major regional hub for petroleum products trading and re-export, benefiting from strategic location and free zone infrastructure
Forecast Growth (2024-2028)	4.2% CAGR	Growth driven by expanding Asian demand, regional refinery capacity additions, and Dubai/Sharjah positioning as trading hubs
Local Production Share	65%	Significant domestic and re-export activity through UAE free zones, with Hamriyah and Jebel Ali as primary trading centers
Regional Trade Flow	Import-oriented for refined products and petrochemicals, with strong re-export activity to South Asia, Africa, and Middle East markets	UAE free zones facilitate third-country trading with minimal documentation and tax-efficient structures
Key Risks	Commodity price volatility, geopolitical tensions affecting supply routes, increasing regulatory compliance, competition from other regional hubs, credit risk from international counterparties	
Key Drivers	Strategic geographic location, world-class port infrastructure, business-friendly free zone regulations, strong banking sector support for trade finance, growing Asian energy demand	
Major Players	Gunvor, Trafigura, Vitol, Glencore, BB Energy, Gulf Petrochem, Midway Trading	

📌 **Summary:** The UAE petroleum and petrochemicals trading sector benefits from strategic location between major supply sources and consumption markets, supported by excellent infrastructure and trade finance availability. Hamriyah Free Zone provides competitive advantages including 100% foreign ownership, tax exemptions, and streamlined customs procedures. Key success factors include supplier relationships, working capital access, storage infrastructure, and counterparty risk management.

SWOT Analysis

💪 Strengths

- Strong revenue growth trajectory - 65% increase in 2024 demonstrating market share gains and effective business development
- Diversified customer base across multiple geographies (UAE, USA, Turkey, India, Pakistan, UK) reducing concentration risk
- Strategic infrastructure investments - new refinery and 27-tank storage facility (50,000 MT) enhancing value chain integration
- Established banking relationships with 5 major UAE banks providing robust trade finance and working capital support

⚠️ Weaknesses

- Increased leverage with debt-to-equity ratio rising to 0.99 in 2024 from near-zero levels, requiring careful debt service management
- Deteriorating liquidity ratios - current ratio declined to 1.18 and quick ratio to 0.87 due to working capital intensive growth
- Low gross margins (4.47%) typical of commodity trading but leaving limited buffer for market volatility or operational issues
- Heavy reliance on trade credit and short-term borrowings (AED 46.3M) creating refinancing and rollover risk

🚀 Opportunities

- New refinery and storage infrastructure becoming operational in 2025-2026 enabling margin enhancement through value-added processing
- Expanding into higher-margin specialty chemicals and lubricants leveraging existing customer relationships and logistics network
- Geographic diversification with investments in Indonesian mining operations (PT Sinar Bahtera Sejati) opening new revenue streams
- Growing global energy transition creating demand for petrochemical feedstocks and specialty products where company can position

⛔ Threats

- Commodity price volatility creating margin pressure and working capital fluctuations in petroleum and mineral trading
- Geopolitical risks affecting trade routes and supplier relationships, particularly given exposure to Middle East, Asia, and Eastern markets
- Increasing working capital requirements to support growth potentially straining liquidity and requiring additional financing
- Counterparty credit risk from international customers with 30-90 day payment terms totaling AED 49.8 million in receivables

💪 Strengths

- Strong revenue growth trajectory - 65% increase in 2024 demonstrating market share gains and effective business development
- Diversified customer base across multiple geographies (UAE, USA, Turkey, India, Pakistan, UK) reducing concentration risk

PAYMENT TERMS
60 days net

REVIEW FREQUENCY
Quarterly

Credit Opinion:
Approve with Conditions: Credit facility of USD 3.5 million recommended with 60-day payment terms. Company demonstrates strong revenue growth trajectory (65% in 2024), consistent profitability, and healthy ROE of 18.84%. Key strengths include diversified customer base, established banking relationships with 5 UAE banks, and strategic investments in infrastructure. Conditions: (1) Maintain current ratio above 1.2x, (2) Quarterly financial monitoring given rapid growth and increased leverage, (3) Debt-to-equity ratio should not exceed 1.2x, (4) Monitor utilization of new refinery and storage facilities. Risk factors include increased leverage (D/E 0.99 vs 0.07 prior year), working capital pressure, and commodity price volatility. Overall credit quality remains acceptable for trading relationship with stipulated monitoring.

🔔 16. MONITORING & TRIGGERS

Monitoring Triggers

The following events should trigger an immediate credit review:

Trigger Event	Action Required
Current ratio falls below 1.15	Immediate review and potential limit reduction
Debt-to-equity exceeds 1.2x	Credit committee review and covenant discussion
Payment delays exceeding 15 days	Account review and payment plan discussion
Quarterly revenue decline >20%	Request updated financials and management discussion
New litigation or regulatory issues	Legal review and exposure assessment

Critical Alerts to Watch

🚨 **High Priority:** Zero tolerance for material litigation

⚠️ **Medium Priority:** Payment delays — threshold: 15 days maximum before escalation

ℹ️ **Low Priority:** Changes in ownership structure or management

📎 17. APPENDICES

Appendix A: Scoring Methodology

Score	Components	Weight
Viability Score	Financial health, payment history, industry outlook, management quality	Variable
Delinquency Score	Past payment behavior, current financial position, credit utilization	Variable
Failure Score	Liquidity ratios, debt levels, profitability trends, market conditions	Variable
Payment Index	Historical payment patterns, average days to pay, dispute frequency	Variable

Appendix B: Credit Rating Scale

Rating	Risk Level	Description	Recommendation
AAA – AA	Minimal	Excellent creditworthiness, strong financial position	Extend full credit
A – BBB	Low	Good creditworthiness, stable outlook	Standard credit terms
BB – B	Medium	Adequate creditworthiness, some concerns	Secured / reduced credit
CCC – C	High	Weak creditworthiness, significant risk	Cash terms only
D	Default	In default or bankruptcy	No credit extension

Appendix C: Data Sources

Source Type	Details
Commercial Registry	Official government commercial registration records and gazette publications
Financial Statements	Audited or management accounts submitted by the subject company
Tax & Regulatory Bodies	National tax authority records, VAT/Zakat compliance certificates
Legal & Court Records	Public court filings, judgment registers, and lien records
Trade References	Direct supplier and customer interviews and payment history surveys
Banking Information	Bank confirmation letters and banking relationship disclosures
News & Media	Licensed press databases, official press releases, verified news outlets
Industry Databases	Sector reports from recognized research agencies and trade associations
On-Site Visits	Field visits, management interviews, and facility inspections where conducted

📝 Analyst Comment on Data Quality

Data Quality:	High
Limitations:	2024 financial statements are unaudited management accounts; full audited statements expected by Q2 2026. 2025 figures are projections provided by management and not independently verified. Investment in Indonesian associate (PT Sinar Bahtera Sejati) shown at cost with no operational updates as mining operations have not yet commenced. Customer concentration data not fully disclosed - top 5 customers estimated at 45-50% of revenue. Supplier payment terms vary by transaction and commodity type.
Analyst Note:	Analysis based on audited financial statements for 2022 and 2023 (Baker Tilly MKM Chartered Accountants), management accounts for 2024, detailed questionnaire responses from Finance Manager Mr. Vijay Nareja dated February 23, 2026, and publicly available information on UAE petroleum trading sector. Data quality is high for historical periods with audited statements. 2024 figures and 2025 projections should be verified upon availability of audited statements. Company has been cooperative in providing information and maintains professional accounting standards.
