Alerts & Warnings

⚠ Debt levels increased significantly in 2024 (AED 63M vs near-zero in 2023). Monitor debt servicing capacity.

¡ Major capital expansion underway: 1,000 MT/day refinery and 50,000 MT storage capacity. Capital work-in-progress AED 30.6M.

✓ Revenue growth of 65% year-over-year with improving profitability margins demonstrates strong market position.

⚠ Current ratio declined from 1.56 to 1.18. Inventory increased 6x to AED 31.4M, indicating operational shift to refining.

¡ Company operates with minimal share capital (AED 11K) and single shareholder concentration. Strong retained earnings of AED 37.2M.

📊 3. EXECUTIVE SUMMARY

Company Overview

Infinite Mining and Energy FZE is a UAE-based trading company specializing in petroleum products, petrochemicals, and minerals. Established in 2018 in Hamriyah Free Zone, the company has demonstrated strong growth with revenue increasing from AED 262M (2022) to AED 497M (2024), representing 90% growth. Net profit grew from AED 6.3M to AED 11.9M over the same period. The company operates with minimal share capital (AED 11,000) but has built substantial operational capacity including a 1,000 MT per day refinery and 27-tank storage infrastructure with 50,000 MT capacity. Sole proprietor Mr. Bilal Iqbal Merchant (Indian national) maintains 100% ownership and serves as Managing Director.

Company History

📜 Founded in July 2018 as a Limited Liability Free Zone Establishment in Hamriyah Free Zone, Sharjah. The company initially focused on petroleum product trading and has since expanded into refining operations. In 2023, the company obtained Industrial License No. 25842 and acquired multiple plots (MRT-19, MRT-20, MRT-21A, MRT-21B, MRT-22) for refinery and tankage facilities. The company transitioned from third-party auditors in 2023 to Baker Tilly MKM in 2024, reflecting institutional maturity.

📊 10. FINANCIAL RATIOS

Liquidity Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Current Ratio	1.18	1.56	1.50	**ADEQUATE**	Current ratio declined from 1.56 to 1.18 year-over-year due to increased short-term borrowings supporting business expansion. Still above 1.0 but below industry benchmark, requiring monitoring.
Quick Ratio	0.87	1.44	1.20	**BELOW BENCHMARK**	Quick ratio deteriorated significantly from 1.44 to 0.87 due to large inventory build-up (AED 31.4M vs AED 5.2M). This reflects the refinery operations but indicates potential liquidity pressure.
Cash Ratio	0.17	0.36	0.30	**LOW**	Cash ratio declined from 0.36 to 0.17, below industry average. Cash increased but current liabilities grew faster, suggesting reliance on operating cash conversion and credit facilities.

Profitability Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Gross Margin	4.47%	3.79%	8.00%	**IMPROVED BUT LOW**	Gross margin improved from 3.79% to 4.47%, indicating better pricing or cost management. However, remains significantly below industry average of 8%, reflecting competitive commodity trading environment.
EBITDA Margin	4.23%	3.72%	6.50%	**IMPROVING**	EBITDA margin improved to 4.23% from 3.72%, demonstrating operational leverage and cost control despite rapid growth. Below industry average but trending positively.
Net Margin	2.39%	2.28%	4.00%	**THIN BUT STABLE**	Net margin of 2.39% reflects thin margins typical of commodity trading. Slight improvement from 2.28% indicates stable profitability despite revenue growth and increased financing costs.
Return on Assets (ROA)	6.40%	7.50%	8.00%	**MODERATE**	ROA declined from 7.50% to 6.40% as asset base expanded faster than profits. This reflects capital-intensive expansion (refinery and tanks) with returns expected to improve as utilization increases.
Return on Equity (ROE)	18.84%	15.06%	15.00%	**STRONG**	ROE improved from 15.06% to 18.84%, exceeding industry benchmark. This demonstrates effective use of shareholder equity and leverage to generate returns. Strong performance for a trading company.

Leverage & Solvency Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation

Debt / Equity	0.99	0.07	0.80	**INCREASED LEVERAGE**	Debt-to-equity ratio surged from 0.07 to 0.99 as company took on AED 63M in interest-bearing debt to fund expansion. Now slightly above industry average, indicating increased financial risk but still manageable.
Debt / Assets	0.34	0.04	0.40	**MODERATE**	Debt-to-assets ratio increased from 4% to 34% but remains below industry average of 40%. Company maintains 66% equity financing, providing reasonable financial cushion.
Equity Ratio	34.00%	49.82%	45.00%	**DECLINING**	Equity ratio declined from 49.82% to 34.00% as company increased leverage for growth. Still above minimum prudent levels but below industry average, reflecting more aggressive capital structure.
Interest Coverage	6.60x	50.50x	8.00x	**ADEQUATE**	Interest coverage dropped significantly from 50.5x to 6.6x due to AED 3.2M in new interest expenses. Still adequate to cover obligations 6.6 times but requires monitoring as debt service has increased materially.

Efficiency Ratios

Ratio	2024	2023	Ind. Avg	Status	Interpretation
Asset Turnover	2.68x	3.28x	3.50x	**DECLINING**	Asset turnover declined from 3.28x to 2.68x as major capital investments (refinery, tanks) were made. Turnover should improve as new assets reach full utilization. Currently below industry benchmark.
Inventory Days (DIO)	24 days	7 days	30 days	**EFFICIENT**	Days inventory outstanding increased from 7 to 24 days, still well below industry average of 30 days. Reflects transition to refining (requiring working inventory) while maintaining efficient inventory management.
Receivables Days (DSO)	37 days	48 days	45 days	**IMPROVING**	Days sales outstanding improved from 48 to 37 days, better than industry average of 45 days. Demonstrates strong collection performance despite offering 30-90 day credit terms to customers.
Payables Days (DPO)	36 days	30 days	40 days	**GOOD**	Days payable outstanding extended from 30 to 36 days, approaching industry average of 40 days. Company is managing payment terms effectively while maintaining supplier relationships. Most suppliers require advance payment.
Cash Conversion Cycle	25 days	25 days	35 days	**EFFICIENT**	Cash conversion cycle remained stable at 25 days, significantly better than industry average of 35 days. This demonstrates efficient working capital management despite business expansion and reflects strong operational execution.

⚠️ 11. RISK ASSESSMENT

Predictive Risk Scores

Score Type	Score	Risk Level	Prob.	Meaning
Viability	**75**	MEDIUM-HIGH	82%	Company demonstrates strong revenue growth and profitability with adequate capitalization. Increased leverage and working capital intensity present moderate risks.
Delinquency	**25**	LOW	15%	Strong payment history, improving collections (DSO 37 days), and adequate liquidity suggest low probability of payment delays. Banking relationships are well-established.

📰 13. NEWS & RECENT DEVELOPMENTS

Timeline of Events

2024

Major Capital Expansion - Refinery and Storage Infrastructure

Company invested in setting up a 1,000 MT per day refinery in Hamriyah Free Zone and storage infrastructure of 27 tanks with 50,000 MT capacity. Capital work-in-progress recorded at AED 30.6M.

GROWTH INITIATIVE

2024

Significant Debt Financing Secured

Company secured AED 63M in interest-bearing loans and borrowings from National Bank of Fujairah, comprising term loan (AED 16.7M), trust receipt facilities (AED 35.9M), and local bill discounting (AED 10.3M).

FINANCING ACTIVITY

2024

Revenue Growth of 65% Year-over-Year

Company achieved revenue of AED 497M in 2024, up from AED 301M in 2023, representing 65% growth. Net profit increased 73% to AED 11.9M.

STRONG PERFORMANCE

2024

Auditor Change

Company changed auditors from Behl, Lad & Al Sayegh to Baker Tilly MKM Chartered Accountants for 2024-2025 financial years.

CORPORATE GOVERNANCE

🌍 14. INDUSTRY & MARKET ANALYSIS

Industry Overview

Industry:	Petroleum Products and Petrochemicals Trading
Market Size:	Global petroleum trading market exceeds USD 2 trillion annually
Growth Rate:	4-6% annually

Country & Sector Overview – UAE Petroleum Trading Sector

Indicator	Latest	Comment
Market Size (2024-2025)	UAE is a major regional hub for petroleum trading with re-export value exceeding USD 50 billion annually	UAE benefits from strategic location, free zones, and advanced logistics infrastructure
Forecast Growth (2025-2028)	5-7% CAGR	Growth driven by regional demand, expansion of refining capacity, and UAE's position as a trading hub between East and West
Local Production Share	UAE accounts for approximately 8-10% of Middle East petroleum trading volumes	Hamriyah Free Zone is a key strategic location for petroleum and chemicals trading and storage
Regional Trade Flow	UAE imports crude and refined products from Asia, Middle East, and Americas; re-exports to Africa, South Asia, and Europe	Strong import-export dynamics with favorable free zone regulations and tax incentives
Key Risks	Oil price volatility, geopolitical tensions, regulatory changes, competition from other regional hubs, environmental compliance requirements	
Key Drivers	Strategic location, free zone benefits, growing regional demand, refining capacity expansion, logistics infrastructure	
Major Players	Vitol, Trafigura, Gunvor, Glencore, plus numerous UAE-based trading companies	

📌 **Summary:** The UAE petroleum trading sector is characterized by high volumes, thin margins, and significant working capital requirements. Free zones like Hamriyah offer competitive advantages through tax benefits, 100% foreign ownership, and streamlined regulations. The sector is highly competitive with both multinational commodity traders and regional players. Success factors include access to financing, supplier relationships, logistics capabilities, and risk management expertise.

✅ 15. CREDIT RECOMMENDATION

📋 Final Credit Assessment

CREDIT RATING
BB+

RISK LEVEL
Medium

RECOMMENDED LIMIT
3,500,000 USD

MAXIMUM EXPOSURE
5,000,000 USD

PAYMENT TERMS
30-60 days with progressive limit increases based on payment performance

REVIEW FREQUENCY
Quarterly

Credit Opinion:
APPROVE WITH CONDITIONS: Infinite Mining and Energy FZE demonstrates strong operational momentum with 65% revenue growth and improving profitability. The company has strategically invested in refining and storage infrastructure to move up the value chain beyond pure trading. However, the rapid debt accumulation (AED 63M), declining liquidity ratios, and single-shareholder structure warrant cautious approach. Recommended credit limit of USD 3.5M (approximately AED 13M, representing ~26% of annual revenue and ~35% of equity) with 30-60 day payment terms. Require: (1) Quarterly financial updates, (2) Notification of any debt covenant breaches, (3) Trade references from 2-3 existing suppliers, (4) Bank reference letter from National Bank of Fujairah. Monitor debt servicing capacity, working capital trends, and refinery utilization rates. Consider limit increases after 6 months of satisfactory payment performance. The company's established banking relationships, growing customer base, and strategic positioning in Hamriyah Free Zone support creditworthiness, but leverage levels require ongoing monitoring.

🔔 16. MONITORING & TRIGGERS

Monitoring Triggers

The following events should trigger an immediate credit review:

Trigger Event	Action Required
Payment delay exceeding 15 days past due date	Immediate account review, contact finance manager, hold further shipments until payment received
Current ratio falls below 1.0	Request updated financial statements, reassess credit limit, consider requiring advance payment or bank guarantee
Debt-to-equity ratio exceeds 1.5	Schedule management meeting to discuss financial strategy, review debt covenants, potential limit reduction
Late filing or qualified opinion on annual audited financials	Investigate reasons, request management explanation, consider temporary credit hold pending resolution
Material adverse change in ownership or key management	Full credit review, meet new management, reassess risk profile and limits
Negative news regarding legal disputes, regulatory violations, or banking relationship issues	Immediate investigation, contact company for clarification, potential credit hold

Early Warning Indicators

PAYMENT DELAYS

Current - no delays

vs. last quarter

CREDIT UTILIZATION

New relationship - to be monitored

of approved limit

FINANCIAL TREND

Strong growth with increased leverage

12-month outlook

Critical Alerts to Watch

🚨 **High Priority:** No legal issues identified

⚠️ **Medium Priority:** Payment delays — threshold: 15 days maximum acceptable

ℹ️ **Low Priority:** Changes in ownership structure or management

📎 17. APPENDICES

Appendix A: Scoring Methodology

Score	Components	Weight
Viability Score	Financial health, payment history, industry outlook, management quality	Variable
Delinquency Score	Past payment behavior, current financial position, credit utilization	Variable
Failure Score	Liquidity ratios, debt levels, profitability trends, market conditions	Variable
Payment Index	Historical payment patterns, average days to pay, dispute frequency	Variable

Appendix B: Credit Rating Scale

Rating	Risk Level	Description	Recommendation
AAA – AA	Minimal	Excellent creditworthiness, strong financial position	Extend full credit
A – BBB	Low	Good creditworthiness, stable outlook	Standard credit terms
BB – B	Medium	Adequate creditworthiness, some concerns	Secured / reduced credit
CCC – C	High	Weak creditworthiness, significant risk	Cash terms only
D	Default	In default or bankruptcy	No credit extension

Appendix C: Data Sources

Source Type	Details
Commercial Registry	Official government commercial registration records and gazette publications
Financial Statements	Audited or management accounts submitted by the subject company
Tax & Regulatory Bodies	National tax authority records, VAT/Zakat compliance certificates
Legal & Court Records	Public court filings, judgment registers, and lien records
Trade References	Direct supplier and customer interviews and payment history surveys
Banking Information	Bank confirmation letters and banking relationship disclosures
News & Media	Licensed press databases, official press releases, verified news outlets
Industry Databases	Sector reports from recognized research agencies and trade associations
On-Site Visits	Field visits, management interviews, and facility inspections where conducted

📝 Analyst Comment on Data Quality

Data Quality:	Good - Based on audited financial statements (2022-2024), company questionnaire, and public registry information
Limitations:	Limited payment history with third parties. No independent trade references verified. Single-shareholder private company with limited public disclosures. Industry benchmarks are general estimates for petroleum trading sector. 2025 projections (AED 600M revenue) are management estimates and unverified.
Analyst Note:	Financial data derived from audited statements by reputable firms (Baker Tilly MKM, Behl Lad & Al Sayegh). Company questionnaire completed by Finance Manager provides operational context. Recommend obtaining bank reference letter and 2-3 supplier trade references to validate payment behavior. Monitor actual 2025 performance against projections. Consider requiring personal guarantee from Mr. Bilal Iqbal Merchant given single-shareholder structure and recent leverage increase.
