 2. EXECUTIVE SUMMARY

Company Overview

Infinite Mining and Energy FZE is a dynamic and rapidly growing free zone establishment specializing in the import, export, and trading of petroleum products, petrochemicals, and minerals. Incorporated in July 2018 and based in Hamriyah Free Zone, Sharjah, the company has demonstrated exceptional growth, with revenue increasing from AED 262.1 million in 2022 to AED 496.9 million in 2024 (89.6% growth over two years). The company operates a state-of-the-art refinery with capacity of 10,000 barrels per day (3.6 million barrels annually) and maintains strong relationships with global oil majors. With solid profitability (11.9 million net profit in 2024), healthy liquidity ratios, and strategic expansion plans including a 200,000 sq ft facility investment, the company presents a strong credit profile. The management, led by Managing Director Mr. Bilal Iqbal Merchant, has secured significant banking facilities and maintains diversified supplier and customer relationships across Asia, Middle East, Europe, and Americas. Current ratio of 2.34 and equity ratio of 28.8% demonstrate financial stability, though the company has increased leverage in 2024 to fund expansion.

Company History

Infinite Mining and Energy FZE was incorporated on July 31, 2018, as a Free Zone Establishment in Hamriyah Free Zone, Sharjah, operating under Commercial License No. 17189 and Industrial License No. 25842. The company was founded by Indian entrepreneur Mr. Bilal Iqbal Merchant with an initial share capital of AED 11,000 (11 shares of AED 1,000 each). Initially focused on petroleum products trading, the company rapidly expanded its operations to include petrochemicals and minerals. In June 2023, the company signed a landmark agreement with Hamriyah Free Zone Authority to double its investment and establish a multifunctional oil refinery with daily production capacity of 10,000 barrels. The company leased 200,000 sq ft of land for this expansion. By 2024, the company had invested over AED 30.6 million in property, plant and equipment, establishing refinery infrastructure including 27 tanks with 50,000 MT capacity. The company has evolved from a pure trading operation to an integrated refining, processing, and trading enterprise, serving customers across UAE, India, Pakistan, USA, Turkey, and UK. In 2023, the company made a strategic investment of AED 10.7 million (49.96% stake) in PT Sinar Bahtera Sejati, Indonesia, entering the nickel ore mining sector.

 7. OPERATIONS OVERVIEW

Core Activities

Business Description:

Import, export, and trading of petroleum products (coal, clinker, refined petroleum products), petrochemicals, and minerals. The company operates an integrated business model combining refining, processing, storage, and international trading. Key activities include: (1) Petroleum refining using advanced catalyst cracking processes to transform heavy-end feedstocks into high-value products; (2) Trading of petroleum products on third-port basis and from designated zones; (3) Marine bunkering services providing low-sulfur fuel and lubricants to vessels calling at UAE ports; (4) Mineral trading focusing on high-demand raw materials like nickel ore; (5) Storage and logistics with cutting-edge technology for secure handling of petroleum products.

Industry Classification Codes

Code Type	Codes	Description
NACE Codes	19.20 - Manufacture of refined petroleum products; 46.71 - Wholesale of solid, liquid and gaseous fuels	Petroleum refining, wholesale trade of petroleum products and petrochemicals
HS Codes (6-digit)	2710 - Petroleum oils and products; 2711 - Petroleum gas and gaseous hydrocarbons; 2601 - Iron ores and concentrates; 2604 - Nickel ores and concentrates	Petroleum products, LPG, mineral ores (coal, clinker, nickel)

Activities Description

Infinite Mining and Energy FZE operates across the entire petroleum value chain. The company's refinery in Hamriyah Free Zone has a daily production capacity of 10,000 barrels (3.6 million barrels annually) utilizing advanced catalyst cracking processes. The company refines, sources, and supplies premium products directly from world's top-tier refineries and established global oil majors. Product portfolio includes: (1) Coal and clinker (AED 209.8M revenue in 2024); (2) Refined petroleum products including gasoline, diesel, naphtha, CST fuel oil (AED 456.6M in 2024); (3) Petrochemical products including base oils, lubricants, solvents (AED 52.3M in 2023). The company maintains storage facilities with 27 tanks totaling 50,000 MT capacity. Trading operations are conducted both from third-port shipments (24% of revenue) and from designated zones within UAE (76% of revenue). The company serves diverse end markets including industrial, marine, transportation, and manufacturing sectors across five continents.

13. NEWS & RECENT DEVELOPMENTS

Timeline of Events

2023-06-11	Major Expansion Agreement with Hamriyah Free Zone Infinite Mining and Energy FZE signed landmark agreement with HFZA to double investment and establish multifunctional oil refinery with 10,000 barrels/day capacity (3.6M barrels annually). Company leased 200,000 sq ft land for AED 60M+ facility development. POSITIVE
2023-06-12	Strategic Facility Expansion Announced Managing Director Bilal Merchant stated HFZA's strategic location aligns with company's specialties in petrochemical, metallurgy, and energy sectors. Expansion expected to create 100+ jobs and significantly increase storage capacity. POSITIVE
2023-12-20	Investment in Indonesian Nickel Mining Sector Company made strategic investment of AED 10.73M (49.96% stake) in PT Sinar Bahtera Sejati, Indonesia, entering nickel ore mining through 4 companies: PT Kiara Affilani, CV Sentosa Abadi, PT Putra Lameel Parkasa, and Gita Sapta Perdana. POSITIVE
2024-02-01	Secured AED 16.7M Term Loan for Expansion Company obtained term loan facility for capital expenditure related to 1,000 MT/day refinery development in Hamriyah Free Zone with 27-tank storage infrastructure totaling 50,000 MT capacity. POSITIVE
2024-07-01	Record Revenue and Profitability Achieved Company achieved revenue of AED 496.9M (65% YoY growth) with net profit of AED 11.9M, demonstrating successful scaling of refining and trading operations. POSITIVE
2025-06-03	LEI Registration and International Compliance Company obtained Legal Entity Identifier (LEI: 9845005B0K7B91B58180) demonstrating commitment to international financial transparency and compliance standards. NEUTRAL

14. INDUSTRY & MARKET ANALYSIS

Industry Overview

Industry:	Petroleum Products and Petrochemicals Trading and Refining
Market Size:	UAE Oil & Gas Market: USD 45.9 billion (2024); Global Petrochemicals Market: USD 645.55 billion (2024); UAE Petrochemical Sector: AED 294 billion investments
Growth Rate:	5.6% annually

Strengths

- Strong revenue growth of 89.6% over 2 years (2022-2024) demonstrating market traction
- Integrated business model combining refining, storage, and trading operations
- Modern refinery with 10,000 barrels/day capacity and 50,000 MT storage infrastructure
- Strategic location in Hamriyah Free Zone with access to Hamriyah Port and international markets
- Diversified customer base across UAE, India, Pakistan, USA, Turkey, and UK
- Strong banking relationships with 5 major UAE banks providing trade finance
- Healthy liquidity with current ratio of 2.34 and improving cash position
- 100% foreign ownership structure providing operational flexibility
- Tax advantages as Free Zone entity (0% corporate tax under qualifying conditions)
- Established relationships with global oil majors (Gunvor, Trafigura, Chemlube)

Weaknesses

- Limited track record - only 6 years in operation since 2018 incorporation
- Small equity base of AED 11,000 share capital, though retained earnings strong
- Concentrated ownership with single shareholder creating succession risk
- Increased leverage with debt-to-equity ratio of 1.94 to fund expansion
- Thin gross margins (4.47%) typical of commodity trading requiring high volume
- Working capital intensive business model with AED 31.4M inventory and AED 49.8M receivables
- Customer concentration with top customers primarily UAE-based free zone entities
- Limited geographic diversification of operations (single facility in UAE)
- Small management team of 18 employees may constrain scaling capacity
- Exposure to commodity price volatility in petroleum and petrochemical markets

Opportunities

- UAE petrochemical sector expected to grow 8-10% annually through 2030
- Global petrochemicals market projected to reach USD 1,045 billion by 2033 (5.5% CAGR)
- Expansion of refinery capacity from current 10,000 to potentially 15,000+ barrels/day
- Development of value-added petrochemical products with higher margins
- Indonesian nickel mining investment (49.96% stake) providing diversification into battery materials
- Growing demand for low-sulfur marine fuels due to IMO 2020 regulations
- UAE-India CEPA free trade agreement eliminating tariffs on petrochemical products
- Potential to secure long-term supply contracts with industrial consumers
- Bunkering services expansion as UAE maritime trade grows
- ESG opportunities through carbon capture and sustainable refining practices
- Potential IPO or strategic investor to accelerate growth and reduce leverage

Threats

- Energy transition and declining long-term petroleum demand threatening business model
- Intense competition from global trading houses and integrated oil majors
- Commodity price volatility impacting margins and working capital requirements
- Geopolitical risks affecting crude supply chains (sanctions on Iran, Russia)
- US sanctions on UAE free zone petroleum traders creating compliance risks
- Interest rate increases raising financing costs (EIBOR-linked facilities)
- Regulatory changes including UAE corporate tax implementation (9% from 2023)
- Supply chain disruptions from regional conflicts or global economic downturns
- Currency fluctuations (AED pegged to USD but trades in multiple currencies)
- Environmental regulations increasing compliance costs and operational complexity
- Cybersecurity risks in trading operations and financial systems
- Customer credit risk with 30-90 day payment terms on receivables

✓ 15. CREDIT RECOMMENDATION

Final Credit Assessment

Credit Rating:

BB

Risk Level:

MEDIUM

Recommended Limit:

SAR 49.7M

Maximum Exposure:

SAR 74.5M

Payment Terms:

30-60 days with 25% deposit on orders above AED 5M

Review Frequency:

Quarterly (every 90 days)

Credit Opinion:

Infinite Mining and Energy FZE presents a MODERATE RISK credit profile suitable for trade credit exposure up to AED 15 million. The company demonstrates strong growth momentum with revenue increasing 89.6% from AED 262M (2022) to AED 497M (2024), healthy profitability with net income of AED 11.9M, and improving liquidity with current ratio of 2.34. The company's integrated refining-trading business model, strategic location in Hamriyah Free Zone, modern infrastructure (10,000 bpd refinery, 50,000 MT storage), and relationships with global oil majors provide competitive advantages. However, risk factors include limited operational history (6 years), increased leverage (debt-to-equity 1.94), thin commodity trading margins (4.47% gross margin), working capital intensity, and exposure to commodity price volatility and geopolitical risks. The company operates in a highly competitive sector facing long-term transition risks from decarbonization. Management has demonstrated capability through successful refinery commissioning and international expansion (Indonesia mining investment). Banking relationships with 5 UAE banks and clean legal record are positive. RECOMMENDATION: Approve trade credit facility of AED 15M with 30-60 day terms, requiring 25% deposit on orders exceeding AED 5M. Implement quarterly financial monitoring and maintain trade credit insurance. Consider graduated limit increases as track record strengthens.

Detailed Action Plan

Area	Recommendation	Priority
Credit Terms Structure	Implement tiered payment terms: 30 days for orders up to AED 5M, 60 days for AED 5-10M with 25% deposit, 90 days for AED 10-15M with 50% deposit. Require bank guarantee for exposures above AED 15M.	HIGH
Financial Monitoring	Request quarterly management accounts and annual audited statements. Monitor current ratio (maintain >2.0), debt-to-equity (target <2.0), and days sales outstanding (target <60 days). Track inventory turnover and gross margin trends.	HIGH
Trade Credit Insurance	Obtain trade credit insurance coverage for 80-90% of exposure to mitigate payment default risk. Insurance particularly important given commodity trading volatility and geopolitical risks.	MEDIUM
Commodity Price Monitoring	Monitor Brent crude oil, petrochemical feedstock prices, and refining margins. Significant margin compression (gross margin below 3%) should trigger credit limit review and potential reduction.	MEDIUM
Banking Relationship Verification	Obtain annual bank reference letters from National Bank of Fujairah and ADCB confirming satisfactory conduct of accounts and available credit facilities. Verify facility utilization levels.	HIGH
Legal and Compliance Monitoring	Monitor UAE corporate tax compliance post-2023 implementation. Track any sanctions-related developments affecting UAE free zone petroleum traders. Verify maintenance of all operating licenses and permits.	MEDIUM
Management Succession Planning	Assess management depth and succession planning given single shareholder structure. Consider requiring key-person insurance on Managing Director or appointment of additional directors.	LOW

Risk Mitigation Strategies

	Commodity Price Risk: Monitor gross margins quarterly. If margins compress below 3%, reduce credit limit by 30%. Consider price escalation clauses in supply contracts to protect against sudden price movements.
	Concentration Risk: Encourage customer diversification beyond UAE free zone entities. Request customer list quarterly to assess concentration. Limit exposure if single customer represents >20% of company revenue.
	Leverage Risk: Monitor debt-to-equity ratio quarterly. If ratio exceeds 2.5x, require immediate financial review and potential limit reduction. Ensure company maintains minimum equity ratio of 25%.
	Payment Performance Risk: Implement strict aging monitoring. Any invoice overdue >90 days triggers automatic credit hold. Require payment plan for past-due amounts before releasing new shipments.
	Geopolitical and Sanctions Risk: Verify no transactions with sanctioned entities. Monitor US OFAC sanctions lists affecting UAE free zone petroleum traders. Require quarterly compliance certification from company.
	Working Capital Risk: Monitor cash conversion cycle. If inventory days exceed 75 or receivable days exceed 90, investigate potential liquidity stress. Verify bank facilities remain available and unutilized capacity exists.

16. MONITORING & TRIGGERS

Monitoring Triggers

The following events should trigger an immediate credit review:

Trigger Event	Action Required
Gross margin falls below 3% for two consecutive quarters	Immediate financial review, potential 30% credit limit reduction, request updated business plan
Current ratio declines below 1.5	Request immediate liquidity analysis, implement 50% deposit requirement on new orders
Debt-to-equity ratio exceeds 2.5x	Credit hold, request equity injection plan or debt restructuring proposal
Any invoice overdue >90 days	Automatic credit hold, escalate to senior management, initiate collection procedures
Delayed financial statement submission (>120 days after year-end)	Reduce credit limit by 50% until statements received and reviewed
Legal action initiated against company or any lawsuit filed	Immediate investigation, potential credit hold pending resolution
Sanctions or regulatory action against company or related entities	Immediate credit suspension, compliance review, potential relationship termination
Change in ownership or management control	Complete credit re-underwriting, request transition plan and financial projections
Bank facility reduction or cancellation	Request explanation and alternative financing plan, consider limit reduction
Major customer loss (>15% of revenue)	Request updated revenue forecast, assess impact on cash flow and profitability

Early Warning Indicators

PAYMENT DELAYS Moderate - Average 45 days vs. last quarter	CREDIT UTILIZATION 68% of approved limit	FINANCIAL TREND Positive 12-month outlook

18. GLOSSARY & TERMS

Key Terms & Definitions

Term	Definition
PAYDEX Score	A score from 1-100 indicating how promptly a company pays its bills. 80+ is considered good.
Current Ratio	Current Assets ÷ Current Liabilities. Measures short-term liquidity. >1.0 is generally healthy.
Quick Ratio	(Current Assets - Inventory) ÷ Current Liabilities. More conservative liquidity measure.
Debt/Equity Ratio	Total Debt ÷ Total Equity. Measures financial leverage. Lower is generally better.
EBITDA	Earnings Before Interest, Taxes, Depreciation, and Amortization. Measures operational profitability.
DBT (Days Beyond Terms)	Average number of days a company pays past the agreed payment terms.
Viability Score	Predictive score assessing the likelihood of business continuity over 12 months.
Delinquency Score	Predictive score assessing the likelihood of severely late payments (90+ days).
CR (Commercial Registration)	Official business registration number issued by government authorities.
NACE Code	European industry classification system for categorizing business activities.
HS Code	Harmonized System code for classifying traded products internationally.
Zakat Certificate	Certificate proving compliance with Islamic tax obligations (Saudi Arabia).
