Alerts & Warnings

⚠️	HIGH INVENTORY DAYS (83.8 DAYS): Exceptional for perishable fresh produce trading; may indicate slow-moving non-perishable stock (fertilizers/chemicals) inflating DIO. Spoilage risk.
⚠️	ACCRUALS NOTE DISCREPANCY: Note 11 Accruals & Other Credit Balances shows 2025 total of SAR 780,500 on balance sheet but note detail sums to SAR 2,415,131 (same as 2024). Potential note error; balance sheet figure used.
✅	ZERO BANK DEBT: No interest-bearing financial liabilities on balance sheet. Self-funded growth through profit retention.
✅	STRONG EQUITY GROWTH: Equity increased 43.8% year-on-year to SAR 28.2M, driven entirely by retained earnings. Equity ratio 75.4%.

Risk Mitigation Strategies

Strategies to mitigate identified risks:

Mitigation Strategy	Expected Outcome
---------------------	------------------

Restrict credit extension to confirmed, repeat domestic wholesale customers with demonstrated payment history; limit export credit exposure to UAE and Jordan (lower geopolitical risk) without LC requirement

Reduced concentration in high-risk export markets; improved CCC profile

Obtain personal guarantee from sole owner Shulaymiyyah Ahmed Al Wayni and CEO Ayoub Omar Al Wayni as secondary obligors on any credit facility

Direct recourse to controlling principals in event of default; aligns incentives with timely repayment

3. EXECUTIVE SUMMARY

Company Overview

Shryan Al Jazeera Fruits & Vegetables Trading Est. is a Saudi individual establishment headquartered in Jeddah, engaged in the import, export, and wholesale distribution of fresh fruits and vegetables. The company operates four branches across Jeddah, Riyadh, Jizan, and Khams Mushait. For FY2025, revenue grew 11.5% to SAR 53.5 million with a strong equity base of SAR 28.2 million, representing 75% of total assets. Profitability is healthy at 16% net margin. The business carries no formal bank debt but records elevated DSO of ~99 days, reflecting credit risk in receivables. An auditor qualification regarding employee end-of-service provisions and an absence of auditor identity are noted.

Company History

Founded on 23 January 2014 in Jeddah, Saudi Arabia, Shryan Al Jazeera Fruits & Vegetables Trading Est. has grown from a local trader into a multi-branch import and wholesale distributor of fresh fruits and vegetables. The establishment now operates four branches, employs 110 staff, and sources from over 13 countries across Europe, Asia, Africa and the Americas.

Import: China, Costa Rica, Ecuador, Egypt, India, Italy, Morocco, Serbia, Ukraine, South Africa, Spain, Sudan, Turkey, UAE, Vietnam, Yemen. Export: Iraq, Jordan, Libya, Syria, UAE.

Supply Chain

Purchasing (Inbound)

Main Suppliers: EXPORTJAIME SA (Spain), ALL AMERICA TRADING LLC (USA), KIRAN DOKE FRUIT SUPPLAIR (India), SOCIETA DI FRUTTA S.A (Ecuador), EXPORT JAIME S A (Ecuador), SUNRISE FRUITS S A (Ecuador), FRUITSLAND EXPORTADORA DE FRUTAS S.A (Ecuador), EXPORTADORA Y COMERCIALIZADORA AGUIRRE MARISCAL EXPOAGMAR S.A (Ecuador), NATURES PARTNER (India), HM CITRUS (Morocco), PENCH FRUIT (Spain), H&G GLOBAL TRADING LIMITADA (Costa Rica), Domingo Catala SAU (Spain)

Sales (Outbound)

Key Customers: Not individually named in source documents; local and regional wholesale buyers

Local Sales: ~70% estimated (domestic wholesale)
Wholesale distribution through branch network across Jeddah, Riyadh, Jizan and Khamis Mushait

Export: ~30% estimated Iraq, Jordan, Libya, Syria, UAE

Exported Items: Fresh fruits

Payment Method: Bank Transfer

Payment Terms: Bank transfer after arrival of goods, 45 days

Local Sourcing:	Minimal – primarily an import trader Local purchases not separately quantified; majority of COGS relates to imported fresh produce
Importing:	~95% estimated Spain, Ecuador, India, Costa Rica, Morocco, China, South Africa, Vietnam, Ukraine, Egypt, Sudan, Turkey, UAE, Yemen, USA, Italy, Serbia
Imported Items:	Fresh fruits (bananas, mangoes, oranges, citrus, exotics), fertilizers and chemicals
Payment Method:	Credit / Open Account
Payment Terms:	45 days after arrival of goods to warehouse

Shrayan Al Jazeera Fruits & Vegetables Trading Est. is principally engaged in: (1) Import of fresh fruits and vegetables from international origins including Spain, Ecuador, India, Costa Rica, Morocco, China, South Africa, Vietnam, Ukraine, Egypt, Sudan, Turkey, UAE and Yemen; (2) Export of fresh fruits to Iraq, Jordan, Libya, Syria and the UAE; (3) Wholesale distribution of fresh fruits and vegetables, fertilizers and chemicals within Saudi Arabia through its four-branch network. The company holds inventory of bananas, mangoes, oranges, fertilizers & chemicals, and other fresh produce. Activities include cold storage operations, customs clearance, and transport logistics.

10. FINANCIAL RATIOS

Liquidity Ratios

Ratio	2025	2024	Ind. Avg	Status	Interpretation
Current Ratio	3.94	2.26	1.50	LOW	Current ratio of 3.94x in 2025 (up from 2.26x in 2024) significantly exceeds the industry benchmark of 1.50x, indicating strong short-term liquidity. The improvement is driven by a sharp 40.7% reduction in current liabilities, primarily trade payables and related party balances. Comfortable buffer to cover all short-term obligations.
Quick Ratio	2.91	1.67	1.10	LOW	Quick ratio of 2.91x (2024: 1.67x) is well above the industry benchmark of 1.10x. Excluding inventory, the company still holds substantial liquid assets against current liabilities, largely in the form of trade receivables and prepayments. Confirms robust near-term solvency.
Cash Ratio	0.42	0.30	0.25	LOW	Cash ratio of 0.42x (2024: 0.30x) exceeds the industry benchmark of 0.25x. While not overly cash-heavy, the establishment maintains adequate liquid reserves relative to current liabilities. Cash declined from SAR 4.65M to SAR 3.79M in 2025 due to capex investment and related party repayments.

Profitability Ratios

Ratio	2025	2024	Ind. Avg	Status	Interpretation
Gross Margin	23.5%	23.8%	20.0%	LOW	Gross margin of 23.5% in 2025 (2024: 23.8%) is stable and above the fresh produce wholesale industry benchmark of approximately 20%. Marginal compression of 30 bps reflects slightly faster COGS growth (+11.9%) versus revenue growth (+11.5%), attributable to higher materials and logistics costs.
EBITDA Margin	16.6%	19.4%	12.0%	LOW	EBITDA margin declined from 19.4% to 16.6% year-on-year, primarily because 2024 benefited from SAR 2.5M other income versus only SAR 0.75M in 2025. Excluding other income, core operating EBITDA margin is approximately 16.9% in 2025 vs. 16.6% in 2024, showing stable underlying performance. Remains above the 12% industry benchmark.
Net Margin	16.1%	19.2%	8.0%	LOW	Net margin of 16.1% (2024: 19.2%) remains materially above the fresh produce wholesale benchmark of 8%. The decline is attributable to lower other income in 2025 (SAR 751K vs SAR 2.5M in 2024). Core operating performance is resilient; no interest expense further supports net profitability.
Return on Assets (ROA)	22.9%	26.3%	10.0%	LOW	Return on assets of 22.9% (2024: 26.3%) significantly exceeds the industry benchmark of 10%. The modest decline reflects rapid asset base growth (+7%) partially absorbing the slight decrease in net income. Asset utilisation remains highly efficient for an import and wholesale trading operation.
Return on Equity (ROE)	30.5%	46.9%	20.0%	LOW	ROE of 30.5% (2024: 46.9%) exceeds the industry benchmark of 20%. The decline is mechanical – retained earnings grew significantly (equity +44%) as profits are retained rather than distributed, diluting the ROE base. Return generation remains strong in absolute terms.

Leverage & Solvency Ratios

Ratio	2025	2024	Ind. Avg	Status	Interpretation
Debt / Equity	0.33	0.78	0.80	LOW	Total liabilities to equity ratio improved sharply from 0.78x to 0.33x, well below the industry benchmark of 0.80x. The establishment carries no bank debt; the only liabilities are trade payables, accruals, due to related parties, zakat payable, and employee end-of-service provision. Capital structure is debt-free and highly conservative.

Debt / Assets	0.25	0.44	0.45	LOW	Debt-to-assets ratio improved from 0.44x to 0.25x, indicating that 75% of assets are funded by equity. Significant improvement driven by strong profit retention and reduction in trade payables. Well below the 0.45x industry benchmark.
Equity Ratio	75.4%	56.0%	55.0%	LOW	Equity ratio strengthened from 56.0% to 75.4%, comfortably above the 55% industry benchmark. The establishment is self-financed with no bank borrowings, and accumulated retained earnings of SAR 28.1M dominate the balance sheet. Provides strong protection for creditors.
Interest Coverage	N/Ax	N/Ax	3.00x	LOW	No interest-bearing financial debt is present on the balance sheet. No finance costs are recorded in the income statement. Interest coverage ratio is not applicable; the absence of financial debt is a significant credit positive.

Efficiency Ratios

Ratio	2025	2024	Ind. Avg	Status	Interpretation
Asset Turnover	1.43x	1.37x	1.80x	WARNING	Asset turnover of 1.43x (2024: 1.37x) is improving but below the industry benchmark of 1.80x. The main drag is elevated trade receivables (SAR 14.4M, approximately 27 days of total assets) and significant prepayments (SAR 8.1M). Improvement in collections and prepayment management would unlock further efficiency.
Inventory Days (DIO)	83.8 days	89.5 days	30.0 days	HIGH	Days Inventory Outstanding of 83.8 days (2024: 89.5 days) is critically elevated for a fresh fruits and vegetables trader where industry benchmarks are approximately 25-30 days. This may reflect fertilizer & chemical stocks being slower-moving, or fresh produce held longer than ideal. Poses spoilage and working capital risk. Management should investigate inventory composition and turnover.
Receivables Days (DSO)	98.5 days	108.6 days	45.0 days	HIGH	Days Sales Outstanding of 98.5 days (2024: 108.6 days) significantly exceeds the 45-day industry benchmark. While improving, receivables remain high relative to revenue, particularly for perishable goods. A trade receivables provision of SAR 1.31M has been established. Elevated DSO represents the primary credit risk and suggests customers (including export buyers) are slow to pay.
Payables Days (DPO)	57.6 days	93.2 days	45.0 days	WARNING	Days Payable Outstanding declined sharply from 93.2 to 57.6 days (2024 was elevated as trade

payables stood at SAR 9.3M vs SAR 6.5M in 2025). Current DPO is just above the 45-day benchmark, broadly in line with the stated supplier terms of 45 days after goods arrival. Settlement of payables has accelerated in 2025, improving supplier relationships.

Cash Conversion Cycle	124.7 days	104.9 days	30.0 days	HIGH	Cash Conversion Cycle of 124.7 days (2024: 104.9 days) is significantly above the industry benchmark of ~30 days. The CCC has deteriorated year-on-year driven by high DSO (98.5 days) and elevated DIO (83.8 days) relative to declining DPO (57.6 days). This represents a substantial working capital management challenge, with the company effectively financing ~125 days of revenue before converting receivables to cash.
-----------------------	------------	------------	-----------	------	---

 11. RISK ASSESSMENT

Predictive Risk Scores

Score Type	Score	Risk Level	Prob.	Meaning
Viability	74	GOOD	74%	The establishment demonstrates sound financial health with strong equity, zero bank debt, growing revenue, and acceptable liquidity. Key concerns are elevated DSO/CCC, qualified audit opinion on employee provisions, limited financial history (2 years only), and high inventory days for perishables.
Delinquency	62	MODERATE	38%	Moderate risk of payment delinquency. Elevated receivables days (98.5 days DSO) and extended CCC (124.7 days) create potential cash pressure during high-volume import cycles. No historical delinquency data available; assessment is driven by structural working capital metrics.

13. NEWS & RECENT DEVELOPMENTS

Timeline of Events

2026-04-03

Saudi Arabia Fruits & Vegetables Market Growth Continues

The Saudi fresh produce market is projected at USD 7.1 billion in 2025, growing at 6.5% CAGR to 2030, supporting wholesale distributors like Shrayan Al Jazeera.

POSITIVE

2025-09-01

Saudi Agricultural Development Fund SAR 2B Support

The Saudi ADF approved over SAR 2 billion in agricultural credit facilities supporting cold storage and production infrastructure, benefiting the sector.

POSITIVE

Geopolitical Disruption in Export Markets

Active conflicts in key export markets (Syria, Libya, Iraq) continue to pose collection and logistics risk for regional fresh produce exporters.

NEGATIVE

14. INDUSTRY & MARKET ANALYSIS

Industry Overview

Industry:	Fresh Fruits & Vegetables – Wholesale Import, Export & Distribution
Market Size:	USD 7.10 billion (Saudi Arabia, 2025)
Growth Rate:	6.5% CAGR (2025–2030)

Country & Sector Overview – Kingdom of Saudi Arabia

Indicator	Latest	Comment
Market Size (2025)	USD 7.10 billion	Saudi Arabia dominates the GCC fresh produce market at approximately 40% of regional share. Multiple sources estimate the market between USD 6.5B and USD 8.1B; USD 7.1B (Mordor Intelligence) used as primary reference.
Forecast Growth (2025–2030)	6.5% CAGR; market projected to reach USD 9.70 billion by 2030	Growth driven by population expansion, health consciousness, Vision 2030 food security initiatives, and investment in greenhouse and hydroponic technology. Saudi Arabia is the fastest-growing GCC country in the segment.
Local Production Share	~40% self-sufficiency target by 2030 for vegetables; currently heavily import-dependent	Saudi Arabia relies heavily on imports to meet fresh fruit consumption needs; domestic production is expanding through tech-enabled agriculture under Vision 2030.
Regional Trade Flow	Saudi Arabia imports fresh fruits from Spain, Ecuador, India, South Africa, Morocco, Turkey and Asia; exports minimal volumes of fresh produce (dates primarily) and re-exports to GCC/MENA.	The company's import sourcing from 15+ countries and export to 5 MENA markets aligns well with established regional trade routes. Export market vulnerability exists in conflict-affected destinations.
Key Risks	Water scarcity; perishability/spoilage; geopolitical disruption in export markets (Syria, Libya, Iraq); rising logistics/transport costs; food safety regulatory tightening; FX exposure on import contracts; regional competitor expansion	
Key Drivers	Population growth and urbanization; Vision 2030 food security investments; rising health consciousness; SAR 2B+ ADF agricultural credit support; cold chain infrastructure expansion; diversified sourcing network	
Major Players	Almarai, Sadafco, major hypermarket chains (Panda, Carrefour), large wholesale importers at central vegetable markets in Jeddah, Riyadh, Dammam	

Summary: The Saudi Arabian fresh fruits and vegetables wholesale sector is experiencing robust growth underpinned by Vision 2030 food security mandates and a growing urban population. The market is import-dependent for tropical and exotic fruits, creating a structural opportunity for specialist importers with diversified international supplier networks like Shrayan Al Jazeera. Key risks remain logistics costs, perishability management, and collection exposure in conflict-affected export markets.

SWOT Analysis

 Strengths

- Strong equity base of SAR 28.2M (75.4% equity ratio) with zero bank debt providing resilient credit profile and financial independence
- Diversified multi-country import sourcing from 15+ countries reduces single-supplier dependency and supply chain disruption risk
- Established multi-branch distribution network across 4 Saudi cities (Jeddah, Riyadh, Jizan, Khamis Mushait) providing geographic reach and market penetration
- Consistent revenue growth (11.5% in 2025) and strong operating EBIT margin of 15.0%, significantly above industry benchmark of 10%

 Weaknesses

- Critically elevated DSO of 98.5 days and CCC of 124.7 days indicate weak receivables management and substantial working capital trapped in the collection cycle
- Inventory days of 83.8 days are dangerously high for a perishable fresh produce trader, creating spoilage and write-down risk
- Qualified audit opinion on employee end-of-service benefits indicates non-compliance with Saudi Labour Law obligations; actual liabilities are understated
- Minimal registered capital of SAR 20,000 relative to the business scale reflects the individual establishment structure; limited formal governance framework

 Opportunities

- Saudi Arabia's USD 7.1B fresh produce market growing at 6.5% CAGR presents organic revenue expansion opportunities, particularly in premium and organic fresh produce
- Saudi ADF's SAR 2B+ agricultural credit support and Vision 2030 food security programmes may provide access to preferential financing for cold storage and logistics upgrades
- Export market diversification beyond current 5 MENA countries could reduce geopolitical concentration; GCC markets (Kuwait, Qatar, Bahrain, Oman) are underexploited
- Growth in online and modern retail channels in Saudi Arabia provides opportunity to bypass wholesale margin compression and access higher-value B2C or B2B2C channels

 Threats

- Ongoing conflicts in key export markets – Iraq, Syria and Libya – create material collection risk, FX transfer restrictions, and potential trade receivables impairment
- Rising import costs (materials +11.1% YoY to SAR 35.9M) driven by global commodity prices, shipping disruptions, and FX volatility could compress margins if not passed through
- Vision 2030-driven domestic agricultural expansion (greenhouses, hydroponics) may reduce Saudi import demand for certain fresh produce categories over the medium term
- Regulatory risk: Saudi Food & Drug Authority tightening residue limits, traceability and food safety requirements may increase compliance costs and disrupt supply chains

Final Credit Assessment

CREDIT RATING

BB+

RECOMMENDED LIMIT (USD)

USD 500,000

MAXIMUM EXPOSURE (USD)

USD 750,000

RISK LEVEL

Moderate Risk

MAXIMUM EXPOSURE (USD)

USD 750,000

PAYMENT TERMS

Net 45 days from invoice date; Letters of Credit or confirmed bank transfer recommended for transactions exceeding USD 150,000

REVIEW FREQUENCY

Semi-Annual (every 6 months); immediate review upon any adverse trigger event)

Credit Opinion:

Shrayan Al Jazeera Fruits & Vegetables Trading Est. is assigned a credit rating of BB+ reflecting a moderate risk profile. The establishment's principal credit strengths are its substantial and growing equity base (SAR 28.2M, USD 7.5M equivalent), zero bank debt, consistent double-digit revenue growth, and strong operating margins materially above industry benchmarks. The absence of formal bank borrowings eliminates refinancing risk. Credit concerns centre on persistently elevated trade receivables (DSO 98.5 days) and a deteriorating cash conversion cycle (124.7 days), which are structurally inconsistent with a perishable fresh produce business and signal aggressive credit extension to customers. Additional concerns include the auditor's qualified opinion on employee provisions, elevated inventory days for perishable goods, undisclosed related party transaction terms (SAR 1.65M), and a note-level discrepancy in accrued liabilities. Limited to two years of audited financial statements constrains trend analysis. A recommended credit limit of USD 500,000 (approx. SAR 1,878,000) is considered appropriate, with maximum exposure not to exceed USD 750,000. Exposure should be structured with short settlement cycles and trade documentation requirements.

16. MONITORING & TRIGGERS

Monitoring Triggers

The following events should trigger an immediate credit review:

Trigger Event	Action Required
Any legal proceedings, regulatory actions, or ZATCA/GAZT enforcement actions filed against the establishment	Immediate credit freeze pending investigation; legal counsel review
Change in ownership or management of the establishment	Full KYC and credit re-evaluation of new principals; credit suspended until review completed
Audit opinion downgrades from Qualified to Adverse or Disclaimer in subsequent financial statements	Immediate credit suspension; demand for repayment of outstanding exposure

Early Warning Indicators

PAYMENT DELAYS

Moderate Risk

vs. last quarter

CREDIT UTILIZATION

**N/A – First engagement;
no prior credit history

of approved limit

FINANCIAL TREND

**↑ Growing Revenue, ↓
Declining Net Income
(one-off other income
effect)**

Critical Alerts to Watch

 **High Priority:** USD 25,000

 **Medium Priority:** Payment delays — threshold: 30 days past due

 **Low Priority:** Changes in ownership structure or management

 17. APPENDICES

Appendix A: Scoring Methodology		
Score	Components	Weight
Viability Score	Financial health, payment history, industry outlook, management quality	Variable
Delinquency Score	Past payment behavior, current financial position, credit utilization	Variable
Failure Score	Liquidity ratios, debt levels, profitability trends, market conditions	Variable
Payment Index	Historical payment patterns, average days to pay, dispute frequency	Variable

Appendix B: Credit Rating Scale			
Rating	Risk Level	Description	Recommendation
AAA – AA	Minimal	Excellent creditworthiness, strong financial position	Extend full credit
A – BBB	Low	Good creditworthiness, stable outlook	Standard credit terms
BB – B	Medium	Adequate creditworthiness, some concerns	Secured / reduced credit
CCC – C	High	Weak creditworthiness, significant risk	Cash terms only
D	Default	In default or bankruptcy	No credit extension

Appendix C: Data Sources

Source Type	Details
Commercial Registry	Official government commercial registration records and gazette publications
Financial Statements	Audited or management accounts submitted by the subject company
Tax & Regulatory Bodies	National tax authority records, VAT/Zakat compliance certificates
Legal & Court Records	Public court filings, judgment registers, and lien records
Trade References	Direct supplier and customer interviews and payment history surveys
Banking Information	Bank confirmation letters and banking relationship disclosures
News & Media	Licensed press databases, official press releases, verified news outlets
Industry Databases	Sector reports from recognized research agencies and trade associations
On-Site Visits	Field visits, management interviews, and facility inspections where conducted

 Analyst Comment on Data Quality

Data Quality:	6.5/10
Limitations:	1. Only two years of audited financial statements provided (2024 and 2025); no 2023 or 2022 comparative audited data available despite questionnaire requesting 3 years. Balance sheet section of questionnaire was left blank. 2. Auditor name and firm identity not disclosed anywhere in the financial statements – auditor signature page absent from provided PDF. 3. Note 11 (Accruals & Other Credit Balances) shows a 2025 total of SAR 780,500 on the balance sheet but note detail sums to SAR 2,415,131 (identical to 2024 comparative) – apparent note preparation error; balance sheet figure used per Rule 5 hierarchy. 4. Statement of Changes in Equity closing balance (SAR 28,130,802) does not reconcile to Statement of Financial Position total equity (SAR 28,170,821) – difference of SAR 40,019. Balance sheet is authoritative. 5. Related party transactions (SAR 1,651,000 due to related parties) have no documented terms, interest rate, or counterparty identity per Note 3.8. 6. Cash flow statement shows CFO of SAR 2,233,430 computed from 'Net income before zakat' of SAR 8,581,196 – this figure is actually net income AFTER zakat per the income statement. Minor presentation inconsistency. 7. Individual establishment (Muassasa Fardiyah) legal form provides no limited liability protection; sole owner bears unlimited personal liability. 8. No 2023 financial data available; year_3 fields populated with opening cash balance only. 9. Customer names not disclosed in questionnaire. Finance Manager and Purchasing Manager names not provided. 10. CR notes 'issued 22 Rajab 1435H = April 5, 2017G' but questionnaire states registered date 23/01/2014 – discrepancy between CR registration date and notes; CR number 4030263927 is consistent across documents. 11. Trade license expiry date not provided.
Analyst Note:	Primary data sources: (1) Audited Financial Statements for year ended 31 December 2025G, approved 28 February 2026, prepared under IFRS for SMEs / SOCPA – Qualified Opinion. (2) Credit Scoring Information Request Questionnaire dated 30/03/2026, prepared by Ayoub Omar Al Wayni (CEO). Industry benchmarks and market size data sourced from Mordor Intelligence, Research and Markets, and Verified Market Research via web search (2025-2026 publications). Exchange rate SAR/USD 0.2664 sourced from Exchange-Rates.org as at April 2026. All credit-related monetary limits expressed in USD per platform Rule 11. Where financial statement data conflicted with notes, balance sheet and income statement figures were used as authoritative per Rule 5.
